5(a) Positively prepared Please tick which box(es) apply

5(b) Justified

5(c) Effective

5(d) Consistent with national policy

Objection is made to the wording of this allocation in relation to site b) Land at Rowley Lane. It is acknowledged that the allocation does not allow development until a review of this plan. However, the removal of the site from the Green Belt and safeguarding it for employment development does establish the principle of development if there is a need to use this area for meeting longer term employment needs. As indicated in paragraph 3.9 of the supporting text, the safeguarded area includes a former sports ground on which a sports hub or sports centre of excellence may also be considered appropriate. This reference is welcomed in principle and Sport England is aware of the current planning application for a centre of excellence on this site. However, the safeguarded area in the policy itself only safeguards the area for employment development which can be interpreted that the whole of the safeguarded area (including the sports ground) could be released for employment development without the need for mitigation for the loss of the former playing fields in the event that a sporting hub/centre of excellence is not implemented. This potential loss of part of the site that was used for playing fields without any mitigation would result in the loss of a significant amount of land last used as playing fields that could as an alternative meet unmet community needs e.g. any needs identified through the Council's emerging Indoor Sport and Playing Pitch Study.

The fact that part of the site has not been used for playing fields for more than 5 years is not considered to be a material consideration. Government planning policy in paragraph 74 of the NPPF (and Sport England's playing fields policy) does not make reference to a timescale after which an alternative policy approach would be acceptable. Furthermore, the lawful use of part of the site would still be a playing field. The only relevance of a '5 year' timescale is that there is no requirement to consult Sport England as a statutory consultee on planning applications where land has not been used as a playing field for more than 5 years. However, this is just a legislative requirement (The Town and Country Planning (Development Management Procedure) (England) Order 2015) in terms of consultation on planning applications and is not related to Government planning policy on playing fields. Planning case law would support this view.

Consequently, there is a concern that the approach in the allocation policy would not accord with Government policy in paragraph 74 of the NPPF. Furthermore, it has not been satisfactorily demonstrated through the Council's evidence base that the playing fields that would be lost if this area is released in the future for employment development are surplus to community requirements. The policy in its current form would not therefore be considered to meet the consistent with national policy or justified tests of soundness.

6. If you consider the Plan is not legally compliant or fails to comply with the Duty to Co-operate or, having regard to the criteria you ticked at 5 above relating to soundness is unsound, please give details of why. Please be as precise as possible.

If you wish to comment in support of the Plan's legal compliance, compliance with the Duty to Co-operate or soundness or wish to make any other comment, please also use this box.

7. Please set out as precisely as possible what change(s) you consider necessary to make the Plan

- legally compliant or
- sound (having regard to the criteria you ticked at 5 above relating to soundness).

You will need to say why this change will make the Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of any policy or text.

To address this it is requested that policy SADC10 (b) be amended to recognise that the land last used as playing fields within this safeguarded area would be expected to be used for a potential sports hub/sports centre or alternatively, off-site playing field mitigation would be required if employment development was implemented and the Council's on playing fields evidence base identifies a need for new or improved playing field provision to meet current or future community playing field needs.

4(a) Legally Compliant	Yes		No		no comment to make	x
4(b) Compliant with the Duty to Co-operate	Yes		No		no comment to make	x

Policy SADM33 is broadly supported as it takes a positive approach in principle to the provision or enhancement of community facilities which would include sports facilities.

The amendments made to the site specific requirements for site C1 which are consistent with amendments made to policy SADM 1 – site H9 are also welcomed.

The amendments made to the final paragraph of the site specific requirements for site C2 (Hertswood Lower School) in response to comments made by Sport England on the Consultation Draft SADM plan are also broadly welcomed as this makes explicit provision for Hertswood Upper School site's playing fields to be relocated to the Lower School site with requirements relating to the quality, accessibility and programming of playing field provision. This approach would accord with paragraph 74 of the NPPF.

However, the amendments to the site specific requirements for site C2 do not make explicit provision for indoor sports facilities to be made available for the community throughout the development period or for replacement indoor facilities to be made available as soon as possible. The Lower School site includes the Hertswood Leisure Centre which is a dual use leisure centre that helps meets the indoor sports needs of the wider community as well as the school. Parts (i)-(iii) of this section make explicit provision for the theatre and the playing fields to be programmed and delivered to minimise disruption to the school and the community but not the indoor sports facilities which are of similar importance. The final sentence also makes provision for the playing fields to be made available for community use on a basis acceptable to the Council but not the indoor sports facilities. While the current planning application for the redevelopment of the Lower School site makes proposals which Sport England considers acceptable in principle in relation to phasing and delivery of these facilities, as this policy will be a material planning consideration when this (or any future) application is determined it is important that the policy makes explicit reference to this. This would allow consistency with Government policy in paragraph 74 of the NPPF which applies to sports facilities as well as the approach taken in the policy to other school/community facilities.

*Programme of development on the two sites to be considered against Policy CS19 (key community facilities) and agreed, in particular, to ensure that (i) the proper level of school facilities, including playing fields **and indoor sports facilities**, is available throughout the development period, (ii) there are local facilities available to allow the satisfactory operation of theatre activities **and indoor sports facilities** throughout the development period, and (iii) the provision of the replacement theatre premises **and indoor sports facilities** is made at the earliest possible opportunity. The playing fields **and indoor sports facilities** are to be made available for community use on a basis to be agreed with the Council.*
