Community Infrastructure Levy (CIL)

Last Modified July 26, 2013 | Share this page

A new charge which will help pay for future community projects like schools, hospitals, road schemes and play areas in Hertsmeres will be introduced in 2014.

Community Infrastructure Levy (CIL) is a tariff that local authorities in England can place on new developments such as small to large-scale residential developments, hotels, and retail or office space, in their area. The money generated through the levy will contribute to the funding of infrastructure to support growth.

Why is this new levy being introduced?

The charge has been introduced by the Government as it believes CIL is a fair and transparent way to fund projects, and developers will benefit from knowing upfront what the charges will be.

We are responsible for setting the charge, collecting it and for deciding which projects to spend the money on.

How much will it be?

Draft proposals on the rates we intend to charge for each type of development have been published as the Draft Charging Schedule. These proposed rates aim to generate enough money to help fund infrastructure without putting development in the borough at risk.

How can I have my say?

Following the consultation on the CIL Preliminary Draft Charging Schedule (between March 1, 2013 and April 3, 2013), we considered all the comments received, and made appropriate changes where necessary.

A Draft Charging Schedule has been produced, which we think is ready for public examination by an inspector. We are now undertaking a six week public consultation, during which time residents and interested parties can make comments or representations, before we submit the schedule for examination.

The period for representations to be made will run from **26 July 2013 to 6 September 2013**.

All comments must be received by 5 pm on 6 September 2013.
